Our Emergency Vehicle Conversions

We are a trusted conversion partner of many major manufacturers such as Volkswagen, Skoda, Seat, Iveco, Mercedes, Peugeot and Vauxhall enabling us to provide a one stop shop facility for any fleet solution.

Our Conversions

Working in conjunction with blue and amber fleet operations across the UK, CM Specialist vehicles have developed a deep understanding of the emergency service sector and its complex and demanding conversion requirements. We apply superb craftsmanship and conversion skills to a range of standard production vehicles to specialist fleet operators ensuring long service life and maximum protection.

Our Expertise

Every conversion we carry out is done to the highest standard. We provide full design consultation to ensure every vehicle meets the exact specification of the customer. From gun boxes to racking, air conditioned dog transport solutions and ballistically protected glass, we provide exceptional police vehicles that give the required protection to threat level, but maintain the vehicle's handling characteristics due to minimal weight increase.

CM AES provides a specialist skill set in the build and installation of integrated electrical and communication systems for specialist vehicles for the Police, Fire, Ambulance authorities, the Military, Security Organisation and Government Agencies.

Our expert team of electrical engineers provide a full suite of fit-out services to cater for any sector including tracker enforcement, matrix signs, ANPR, force radio, mobile data terminals, reversing media systems, IDR and JDR systems and audio visual equipment. All fit-outs are executed to ensure maximum resale value of the fleet.

Reliability

Our engineering team has the perfect mix of qualified engineers and coach building experts. The consistency of our design and application leads to reliable and robust installations.

Experience

Our vehicle conversion experience ensures that quality and reliability are built in from the start of every conversion we undertake. We pride ourselves on being able to deliver all conversions to the highest standard.

Quality

All of our vehicles are built under the guidance of our quality assurance to meet the ISO 9001:2008 standards. We work closely with our dedicated Type Approval Engineer to provide certification when required.
